CampusMart | relational model

PORTFOLIO 1 / Five tables / PostgreSQL

customers

PK	customer_id : bigint
	full_name : varchar(100)
UQ	email : varchar(254)

1 — 0..*

categories

PK	category_id : bigint
UQ	category_name : varchar(80)

1 — 0..*

orders

PK	order_id : bigint
FK	customer_id : bigint
UQ	order_reference : varchar(20)
	order_date : timestamptz
	status : varchar(15)

1 — 0..*

products

PK	product_id : bigint
FK	category_id : bigint
UQ	sku : varchar(20)
	product_name : varchar(120)
	price : numeric(12,2)
	stock_quantity : integer

1 — 0..*

order_items

PK,FK	order_id : bigint
PK,FK	product_id : bigint
	quantity : integer
	unit_price : numeric(12,2)

PK = primary key FK = foreign key UQ = unique key 0..* = zero or many
